## Respiratory Season Ordering Guidelines (COVID, FLU, RSV only)

The results from these test(s) will affect clinical decision-making. Examples include:
--Treatment initiation
--Room assignment for admission
--Discharge to convalescent care

No →

The following orders should be used:
--CV19 (LAB20442): COVID only
--FLABR (LAB10744): Flu A & B only
--RSVNA (LAB20614): RSV only

If using an order set, do not select tests named "Rapid."

Most media types are allowed. Examples are below. Refer to NorDx Test Catalog for most up-to-date information.

Yes ↓
